DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1, 3, 12, and 14, are rejected under 35 U.S.C. 102(b) as being anticipated by Sherrod, 4642756.

2. As per claim 1 and 12, Sherrod discloses a plurality of activatable modules with corresponding priority values on lines 14-16, on column 3; a scheduler activating the modules as a function of the corresponding priority values on lines 20-22, on column 3; the activates modules generating data by analyzing the states of the system on lines 1-8, on column 4; and a priority manager modifying the corresponding priority value of at least one of the modules to one of increase and decrease the respective corresponding priority value relative to the priority value of another of the activatable modules on lines 35-42, on column 4.

3. As per claim 3 and 14, Sherrod discloses the priority manager modifies the corresponding priority of the module as a function of the states of the system on lines 35-37, on column 4.

Allowable Subject Matter

2. Claim 8, 9, 11, and 10, 17-20 are allowed.

3. Claims 2, 4, 13, 15, 5, 6, 7 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not disclose selecting a first module with the highest priority for activation wherein the scheduler assembles a residual set of modules from the set of activatable modules wherein the scheduler selects a third modules from residual set of the activatable modules for activation; and wherein the scheduler repeatedly selects a third module, each of the third modules having a respective highest priority wherein the scheduler assembles the residual set of the activatable modules which exclude the third modules already selected for activation and fourth modules that must not activated simultaneously with the third modules, wherein the scheduler selects repeatedly until the residual set does not contain any of the activatable modules; modifying the corresponding priority value of a module as a function of a time period; modifying the respective corresponding priority value of a particular module of the activatable modules as a function of an activation message and a deactivation message; modifying the corresponding priority value of a particular module of the activatable modules as a function of absolute time signals.

Response to Arguments

5. Applicant's arguments filed 9-29-03 have been fully considered but they are not persuasive. For claims 1, 3, 12, and 14, applicant argues the activated modules generating data by analyzing the states of the system is not disclosed by Sherrod. This

is disclosed in Sherrod as the tasks themselves. Each task of the system is doing some action that depends on the state of the system.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
